✶ 40 - 50% - immediately or as agreed upon

We are looking for you!
At Eaternity we sell an application that enables individuals, institutions and restaurants to calculate and optimise the CO_2-footprint of their own menus and food purchases. We look for an engaged team member with a precise and pragmatic working attitude to join our current team of 7 Food Data Analysts. Do you have a great passion for data, food and sustainability and are you a team-player? Can you work on regular days/hours for up to 40%-50% per week?

Send your application **as soon as possible, but best before the 10th of Mai** to:

Judith Ellens, jellens@eaternity.ch
The position remains open until a suitable candidate is found.

Job Description Food Data Analyst

As our Food Data Analyst or „Matcher Ninja" you will be responsible for the timely and correct processing of food data from our clients to assure the entire calculation of the CO_2-footprint as well as other environmental and health indicators. At a later stage, the job also requires you to generate, review and correct CO_2-reports before sending them to clients and support with data-related client questions and client communication. The job requires commitment, diligence and find joy in being part of a team that aims to contribute towards a more sustainable food society. You bring a good technical skill set, are used to look at excel-files and data, you like to work independently and at the same time have a team-spirit mind. Maybe you even have a background in environmental sciences, food technology, some basic knowledge of LCA or are in any other way already familiar with the topic of food and sustainability.

Responsibilities

- The timely and correct linking of client food data with our environmental data and models
- Acquiring and processing additional product specifications from our clients and food producers
- Support with the quality management of processing food data correctly (updating guidelines, documentation of missing products and product synonyms, report bugs and possible improvements on automatization, improve the linking of targeted products etc.)
- Generating, reviewing and correct CO_2-reports
- Support with data related client questions

Skills

✶Good understanding of German and English

✶Being able to process data efficiently and precisely

✶Strong work ethic and discipline

✶Pragmatic, independent and goal-oriented works style

✶Interest in sustainability, social business and food, together with the motivation that we can change the world.

Benefits

✳You will be part of a small, young and skilled team of great people at a **world changing social start-up**.

✳**Flexible** working environment and freedom to shape your working day (home-office possible)

✳Compensation is between CHF 24.8 - 26.8/h

✳You will collect valuable experience in a start-up team culture and your contribution will make the key difference to Eaternity's success story and the direct **environmental impact** it will have.

About Eaternity http://www.eaternity.org/about/

Eaternity has the vision to establish climate friendly meals in society. Our experience and strong scientific expertise along with our solid and extensive CO_2-database, forms the backbone of our organization. We are about to expand our work on a larger scale and targeting more people by developing a web-application.

We are passionate about changing the world through great software and we are looking for exceptional people to join us in that mission. Our approach is to assemble a small, tightly knit collective of extraordinarily talented peers, while pursuing impact and revenue goals typical of larger enterprises. We believe this approach gives individuals greater ownership and input into decisions, and makes for a more efficient and happier workplace.
